DAIKIN

Turning Data into Smart
Saving and Prediction

DAIKIN REMOTE
MONITORING SYSTEM

SPARE PARTS COVERAGE

Enhanced efficiency and reduced administrative documentation ensures **low repair cost** for your budget.

PROLONGED FUNCTIONALITY

Consistent remote calibration and environmental monitoring **optimises the equipment's lifespan**. Additional predictive system analysis notifies any building air-conditioning abnormalities and emergency repairs in advance, reducing high replacement costs.

GREEN BUILDING

Continuously monitor air-conditioning system efficiency and earn **Green Mark points** with consistent observation and system malfunction analysis.

ENERGY MANAGEMENT

Building owners can control their energy consumption for more savings and achieve **Return on Investment (ROI) within the first year**.

PREDICTION

Obtain up-to-date fault and prediction reports and alerts via SMS, email or mobile application. This allows users to **organise maintenance plans effectively**.

TOWARDS SMART BUILDING MAINTENANCE

DAIKIN REMOTE MONITORING SYSTEM offers the smart choice for building owners* to monitor, predict and earn maximum savings. Being the first to offer 24-hours access to updated diagnostics via multiple outputs, our system also provides continuous monitoring and automatic adjustments for air-conditioning systems. We help building owners reduce their HVAC energy expenses by up to 20%.

With technology as intuitive as Daikin's Remote Diagnosis System, building owners receive first-hand alerts of any service disruption and malfunctions in advance. Additionally, building owners attain more response time to rectify and address issues.
