Having your own service technician anytime, built-in!

Contact your service technician to inform them of the error code and description.

D’Smarthome

D’Smarthome is a customizable solution that can be catered to your needs. With a single interface, the system can be integrated to control various devices and appliances to enhance your comfort, home security, and lifestyle. D’Smarthome is highly expandable, scalable, and compatible with most solutions available on the market.

Intelligent Diagnosis

The self-diagnostic function provides you with the performance data of your air conditioning system. If there is a system error, you will receive alert notification on your smart devices with the error code. With this diagnostic data, your air conditioning technician can determine an accurate course of action quicker, keeping your comfort on track.

Smart Remote Controller

Say goodbye to the conventional remote controller and let your smart devices control your air conditioner system now from anywhere, at home or on the go! You can pre-cool your home from your workplace on a hot day or adjust the temperature in your child’s room while you are watching the TV show in your living room.

Fuss-free Smart Monitoring

Don’t worry about forgetting to turn off your air conditioner! D’Smarthome gives you added peace of mind with the ability to monitor your air conditioning system through your smartphone even when you are away from home.
Heating Water While Cooling The Air

Daikin’s SUPER MULTI HW doubles the air conditioner smartly as a water heater by collecting the discharged heat from the outdoor unit and recovering the heat to generate hot water at nearly zero cost.

Convenient Control of Your Water Heater

D’SmartHome can control your water heater whenever needed to match your busy schedule. You can turn on/off the water heater and adjust water temperature on your smart phone from anywhere. This gives you more energy and money savings when you can monitor your water and energy consumption.

HEAT RECOVERY SYSTEM

Daikin’s Streamer Technology

Daikin’s streamer technology is a type of PLASMA DISCHARGE where the high speed electrons can EFFECTIVELY REMOVE 99.99% of bacteria, viruses and allergens. Enjoy clean and purified air all around with its 6-layer air purifying technology!

Tested to Eliminate PM1.0 Air Pollutants

Daikin Deodorizing Air Purifier is the ONE AND ONLY air purifier tested to effectively remove PM1.0 air pollutants.

Remote Control for Your Air Purifier

Your smartphone can be used as a remote control for your air purifier. Switch your air purifier on when returning home from work; it poor air quality is detected by the indoor air quality sensor, you will receive an alert on your smartphone. You can then choose to activate your air purifier with just a simple tap!

LIFESTYLE

Audio & Visual Entertainment System

Experiencing the fully immersive and interconnected smart home entertainment with D’SmartHome! You can turn your living room into an amazing home theater with just a few clicks on your smartphone.

Lightings
