

Total Indoor Air Quality (IAQ) Solution

Daikin can provide total IAQ Solution for a healthy lifestyle. Having good IAQ inside the building (household/office) prevents the occurrence of 'sick building' and minimises airborne diseases like flu. The IAQ Solution can be customized to the specific needs of the building.

A Steam Cleaning

- Chemical free process which uses high pressure steam to clean clogged evaporator coil
- Healthier air to breathe in with removal of unpleasant smell and odor

Before

After

Duct Cleaning

- Ducting systems are seldom maintained and dust will accumulate after prolonged usage.
- Improves IAQ by removal of dust from ducting system using compressed air for cleaning

Before

After

B Coil Sanitizing by Ozone Water

- Natural disinfection and deodorization
- Environmental Friendly. No use of chemicals

A Air Sanitizing by Ozone Generator

- Remove most odours, germs, bacteria, viruses and mold

B Air Treatment by Daikin Streamer Air Purifier

- Air treatment which removes dust, bacteria, and allergens
- Protects from airborne disease
- Combats respiratory diseases
