

DAIKIN

Air

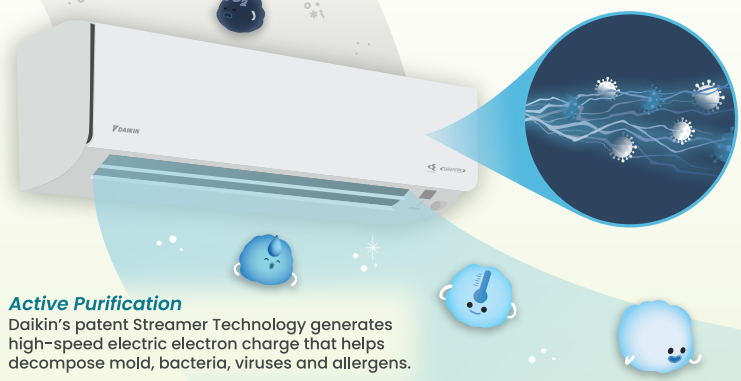

that gives back.

The **W.I.S.E** Companion
for your iSmile Eco+

Streamer Technology

Active Purification
Daikin's patent Streamer Technology generates high-speed electric electron charge that helps decompose mold, bacteria, viruses and allergens.

The "Active Shield" for Your Air

A powerful air-cleaning system built directly into your aircon.

- 1 Press and hold for 2 seconds
- 2 Press and select menu number "3"
- 3 Press to confirm setting
- 4 Press to change "on" or "off"
- 5 Press to toggle on
- 6 Press to go back to default screen

Mold Proof Operation

Automatic Self-cleaning
A self-cleaning hygiene cycle that runs after you turn off your aircon.

Prevent the buildup of mold and minimizes odors
Ensure a cleaner and fresher environment inside your aircon.

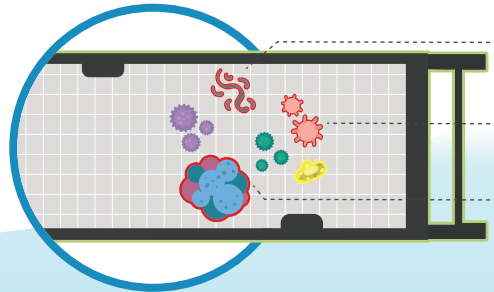

- 1 Press and hold for 2 seconds
- 2 Press and select menu number "2"
- 3 Press to confirm setting
- 4 Press to change "on" or "off"
- 5 Press to toggle on
- 6 Press to go back to default screen

What is PM2.5?

"PM2.5" refers to particles that are 2.5 microns or smaller. Our filter traps these particles before they can be circulated back into your room.

Human Hair
50-70 µm

Dust, Pollen, Mold
< 10 µm

Combustion, particles, organic compounds, metals, etc.
< 2.5 µm

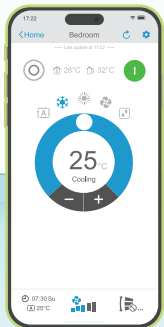

PM2.5 Filter

Microscopic Air Filtration
Daikin's PM2.5 filter goes beyond regular filters to capture microscopic irritants for superior air purity.

PRO-TIP: Replace your PM2.5 filter every 6 months to maintain superb air quality.

Mobile Controller

Control from Anywhere
Built-in wireless adapter in unit turns your smartphone into a powerful remote.

Access anywhere
Monitor and control your cooling remotely, home or away.

Download the Daikin Mobile Controller App

Scan to access the Wi-Fi setup guide

Voice Control

Just Say the Word
Seamless integration with Google Assistant and Amazon Alexa.

"Hey Google, set the living room air-con to 24 degrees."

No movement needed
Make hands-free adjustments, perfect for when you're busy or already tucked in bed.

0.5°C Step Setting

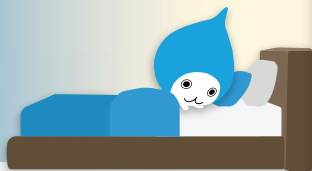

Precision Comfort
Unlike conventional units that adjust by 1°C, the iSmile Eco+ features 0.5°C increments, allowing finer temperature control for personalised comfort.

The Perfect Sleep Partner
An intelligent sleep timer that prevents you from getting too cold overnight.

Night Set Mode

Smart Overnight Comfort
Activated with the OFF TIMER, it prevents over-cooling by raising the temperature 0.5°C after 60 minutes.

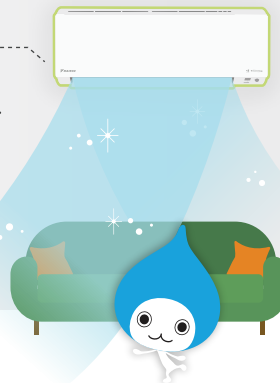

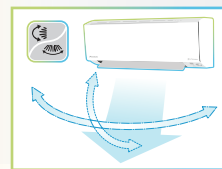

- 1 Press until the desired time setting

- 3 Press to confirm setting
* To cancel, press

No More Hot Spots
Circulates air to every corner, even in large rooms so everyone stays perfectly cool.

3-D Airflow

Total Room Coverage
A combination of vertical and horizontal auto-swing movements.

- 1 Press and
* To cancel, press either or again

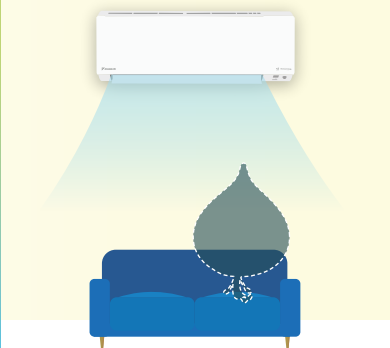

Intelligent Eye Sensor

- 1 Press Sensor
- To cancel, press again

Automated Energy Savings
Auto-saves energy by raising the temperature 2°C after 20 minutes of inactivity.

Cooling Only When You're There
Eliminates energy waste in empty rooms and restores your settings upon return.

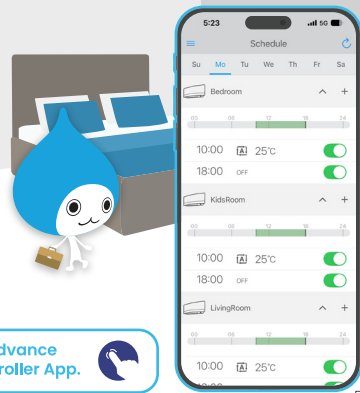

Monday to Sunday

Personalized Weekly Routine
Supports 4 unique programs per day, 7 days a week.

The "Residual Air" Hack
Save energy by scheduling Fan Mode to use leftover cooling after the compressor shuts off.

Weekly Timer

Smart Scheduling for Your Savings
A custom scheduling tool accessible via the Daikin Mobile Controller app and remote.

PRO-TIP: Schedule your settings in advance with the Daikin Mobile Controller App.

R32 Refrigerant

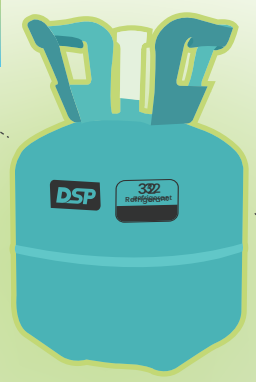

The Green Standard
The next-generation refrigerant that is more efficient at transferring heat.

Zero Ozone Depletion Potential

It has a zero Ozone Depletion Potential (ODP), meaning it does not harm the Earth's ozone layer.

Safer for the Environment

R32 has a Global Warming Potential (GWP) that is 68% lower than the previous R410A standard.

Did you know?

Daikin was the world's first to adopt R32, leading the industry toward a greener future.

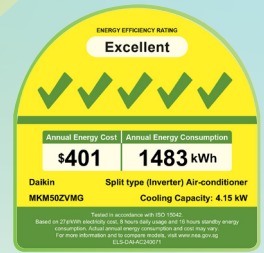

Faster Cooling, Smaller Footprint

It carries heat more effectively, allowing your aircon to use less energy to cool your room.

NEA 5-Tick Rating

Highest in the Market
The highest energy efficiency rating awarded by the National Environment Agency (NEA) in Singapore.

Lower Consumption, Lower Cost

The iSmile Eco+ series is certified with 5 Ticks, ensuring you get the strongest cooling capacity with the lowest possible electricity consumption.

Smart & Eco-Friendly

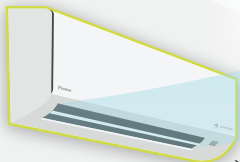

The Trusted Brand
Daikin has been recognized as a top influential brand in the Smart & Eco-friendly category, proving our commitment to quality and sustainability.

SMART & ECO-FRIENDLY
AIR CONDITIONER

Total Room Air Distribution

The cool air gently "rains" down to fill the room evenly, creating a comfortable breeze that travels up to **10 meters*** to cool every corner without direct, uncomfortable drafts.

No Direct Air Drafts

Instead of blowing air directly at you (which can feel harsh), the unit streams air upward along the ceiling.

Indoor Unit Quiet Operation

Peace and Quiet

An ultra-quiet operation mode that reduces the indoor unit's sound to just 19dB.

1 Press  to toggle between modes

Did you know?

19dB is quieter than a library (40dB) or even the rustling of leaves, it is virtually silent to the human ear.

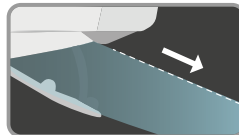

Coanda Airflow

Comfort Without the Draft

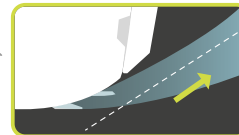

A unique airflow design inspired by the "Coanda effect", which makes air hug the ceiling.

Without Coanda Panel

vs.

With Coanda Panel

! iSmile Eco+ comes with the Coanda panel, designed to bend airflow up towards the ceiling creating a Coanda effect.

Frequently Asked Questions

Q How often should my aircon be serviced?

A At least once every 3 to 6 months if aircon is used daily.

Q Why is my aircon leaking water?

A Water leaks occur when the drainage pipe is blocked by dirt or debris, preventing water from draining properly and causing it to back up

Q Why is the green light blinking?

A A blinking green lamp indicates a potential system fault. Please contact your installer or a service technician for assistance.

Q Why is the aircon not cold?

A Poor cooling may be caused by several factors:

- Dirty air filters or blocked airflow.
- Temperature is set too high.
- Windows or doors are left open.
- Incorrect remote settings (e.g., not in "Cooling" mode).
- Potential mechanical faults.
