## DAIKIN SMARTPHONE CONTROL

Control Your Air Conditioners  
from anywhere via Smartphone

## Daikin Mobile Controller

Application for Smartphones

The Daikin Mobile Controller application lets you manage Daikin inverter air conditioners from anywhere, helping to maintain a comfortable home environment while saving energy. This convenient app gives you full control of core functions such as start/stop, operation mode and set temperature as well as advanced features like weekly scheduling.

The app also lets you monitor your system to ensure it is performing as desired. Setup is extremely easy. After downloading the software, you only need to connect to a private wireless network inside your home or mobile network outside.<sup>1</sup>

### Enjoy more convenience with the IN-HOME OPERATION

At home, the Daikin Mobile Controller application turns your smartphone into a centralised remote controller.<sup>2</sup> It only takes a few easy clicks to check and adjust the temperature in your child's room from the living room. You can also start and stop the air conditioner in the living room from your bedroom.

### Giving you increased comfort & a peace of mind with the OUT OF HOME OPERATION

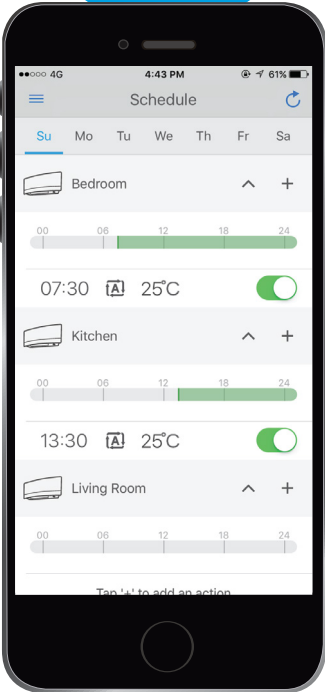

The Daikin Mobile Controller application takes care of those nagging worries about whether you have turned off the air conditioner and ensures a comfortable air conditioned environment is ready when you return home. Even outside your home, you can easily monitor and adjust settings such as the operating status and room temperature or start and stop all units.

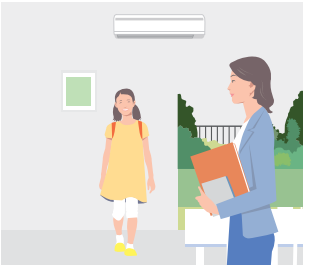

### Weekly Scheduler

Using Weekly Scheduler, you can set up to six patterns for starting and stopping your air-conditioners. Your system will automatically turn on before you wake up or return home and turn off after you go to bed or leave home. Separate patterns can also be set for each day of the week.

42  
actions  
a week

On 7:30 a.m., 25°C

Off 8:30 a.m.

On 1:30 p.m., 25°C

#### Daikin Mobile Controller BRP072A42

Dimensions (H x W x D)  
79 x 52 x 17.5 mm

Gross weight  
40 g

Standby electricity(adaptor only)<sup>6</sup>  
1.2 W or less

Wireless LAN standard  
IEEE802.11 b/g/n (2.4 GHz)

Accessories

- Wire harness (1,600 mm)
- Screws (two pieces)
- Double-faced tape
- Installation manual

The Wireless LAN Connecting Adapter (BRP072A42) meets all of the following:

1. Adapter card(s) is generally available to the public by being sold, without restriction, from stocks at retail selling points by means of any of the following:

- Proshop Dealers
- Authorized Dealers

2. It is designed for installation by the user without significant further support from the supplier.

#### Notes:

1. For compatible smartphones, go to <http://www.daikin.com.sg/index.php/smartphone>. An Internet connection is required to use this service. Standard smartphone charges also apply when using the Daikin mobile controller application to monitor or control air conditioners.
2. In-home control of air conditioners using the Daikin mobile controller application will depend on the effective coverage area of your LAN.
3. The controllable functions differ depending on the model.
4. Monitoring of the outdoor temperature is available for all models during operation. Some models can also perform monitoring while they are not operating.
5. It may not be possible to install the adaptor inside the indoor unit with some models.
6. When using a wireless LAN adaptor, there is continuous transmission between the air conditioner and the adaptor, so the air conditioner will not enter standby electricity saving mode. When the adaptor is connected, the standby electricity consumption of the product is about one Watt.
