DAIKIN ROOM AIR CONDITIONER
OPERATION MANUAL

MODELS
CTKS25QVM
CTKS35QVM
CTKS50QVM

Enjoy year-round comfort.
Features

Enhanced comfort and energy savings

**INTELLIGENT EYE**
The INTELLIGENT EYE sensor detects human movement in a room. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation.

**WEEKLY TIMER**
Up to 4 timer settings can be saved for each day of the week according to your family's life style. The WEEKLY TIMER allows you to set on/off times and the desired temperature.

**Other functions**

**COMFORT AIRFLOW**
The airflow direction is upward while in COOL and DRY operation. This function prevents cold air from blowing directly on your body.

**OUTDOOR UNIT QUIET**
OUTDOOR UNIT QUIET operation assures a low noise level of the outdoor unit. This function is useful to maintain a quiet neighbourhood.

Troubleshooting............................................34
Safety Precautions

- Keep this manual where the user can easily find it.
- Read the precautions in this manual carefully before operating the unit.
- The precautions described herein are classified as WARNING and CAUTION. They both contain important information regarding safety. Be sure to observe all precautions without fail.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Failure to follow these instructions properly may result in personal injury or loss of life.</td>
<td>Failure to follow these instructions properly may result in property damage or personal injury, which may be serious depending on the circumstances.</td>
</tr>
</tbody>
</table>

- Never attempt.
- Be sure to follow the instructions.
- Be sure to establish an earth connection.

- After reading, keep this manual in a convenient place so that you can refer to it whenever necessary. If the equipment is transferred to a new user, be sure also to hand over the manual.

**WARNING**

- To avoid fire, explosion or injury, do not operate the unit when harmful gases (e.g. flammable or corrosive) are detected near the unit.
- Be aware that prolonged, direct exposure to cool air from the air conditioner, or to air that is too cool can be harmful to your physical condition and health.
- Do not place objects, including rods, your fingers, etc., in the air inlet or outlet. Product damage or personal injury may result due to contact with the air conditioner’s high-speed fan blades.
- Do not attempt to repair, dismantle, reinstall or modify the air conditioner yourself as this may result in water leakage, electric shock or fire hazards.
- Do not use flammable spray near the air conditioner, or otherwise fire may result.
- Do not use a refrigerant other than the one indicated on the outdoor unit (R410A) when installing, moving or repairing. Using other refrigerants may cause trouble or damage to the unit, and personal injury.
- To avoid electric shock, do not operate with wet hands.

**CAUTION**

- Beware of fire in case of refrigerant leakage. If the air conditioner is not operating correctly, i.e. not generating cool air, refrigerant leakage could be the cause. Consult your dealer for assistance. The refrigerant within the air conditioner is safe and normally does not leak. However, in the event of a leakage, contact with a naked burner, heater or cooker may result in generation of noxious gas. Do not use the air conditioner until a qualified service person confirms that the leakage has been repaired.
- Do not attempt to install or repair the air conditioner yourself. Improper workmanship may result in water leakage, electric shock or fire hazards. Please contact your local dealer or qualified personnel for installation and maintenance work.
- If the air conditioner is malfunctioning (giving off a burning odour, etc.), turn off power to the unit and contact your local dealer. Continued operation under such circumstances may result in a failure, electric shock or fire hazards.
- Be sure to install an earth leakage circuit breaker. Failure to install an earth leakage circuit breaker may result in electric shock or fire.

- Be sure to earth the unit. Do not earth the unit to a utility pipe, lightning conductor or telephone earth lead. Imperfect earthing may result in electric shock.

**CAUTION**

- Do not use the air conditioner for purposes other than those for which it is intended. Do not use the air conditioner for cooling precision instruments, food, plants, animals or works of art as this may adversely affect the performance, quality and/or longevity of the object concerned.
- Do not expose plants or animals directly to the airflow from the unit as this may cause adverse effects.
- Do not place appliances that produce naked flames in places exposed to the airflow from the unit as this may impair combustion of the burner.
- Do not block the air inlets nor outlets. Impaired airflow may result in insufficient performance or trouble.
- Do not sit on the outdoor unit, put things on the unit, or pull the unit. Doing so may cause accidents, such as falling or toppling down, thus resulting in injury, product malfunctioning, or product damage.
CAUTION

- Do not place objects that are susceptible to moisture directly beneath the indoor or outdoor units. Under certain conditions, condensation on the main unit or refrigerant pipes, air filter dirt or drain blockage may cause dripping, resulting in fouling or failure of the object concerned.
- After prolonged use, check the unit stand and its mounts for damage. If they are left in a damaged condition, the unit may fall and cause injury.
- To avoid injury, do not touch the air inlet or aluminium fins of the indoor or outdoor units.
- The appliance is not intended for use by unattended young children or infirm persons. Impairment of bodily functions and harm to health may result.
- Children should be supervised to ensure that they do not play with the unit or its remote controller. Accidental operation by a child may result in impairment of bodily functions and harm health.
- Avoid impacts to the indoor and outdoor units, or otherwise product damage may result.
- Do not place flammable items, such as spray cans, within 1m of the air outlet. The spray cans may explode as a result of hot air from the indoor or outdoor units.
- Be careful not to let pets urinate on the air conditioner. Urination on the air conditioner may result in electric shocks or fire.
- Do not wash the air conditioner with water, as this may result in electric shocks or fire.
- Do not place water containers (vases, etc.) above the unit, as this may result in electric shocks or fire hazards if they should topple over.
- Do not insert the batteries in the wrong polarity (+/-) or orientation as this may result in short circuiting, fire, or battery leakage.
- To avoid oxygen depletion, ensure that the room is adequately ventilated if equipment such as a burner is used together with the air conditioner.
- Before cleaning, be sure to stop unit operation and turn off the circuit breaker. Otherwise, an electric shock and injury may result.
- Only connect the air conditioner to the specified power supply circuit. Power supplies other than the one specified may result in electric shocks, overheating and fires.
- Arrange the drain hose to ensure smooth drainage. Imperfect drainage may cause wetting of the building, furniture, etc.
- Do not place objects in direct proximity of the outdoor unit and do not let leaves and other debris accumulate around the unit. Leaves are a hotbed for small animals which can enter the unit. Once inside the unit, such animals can cause malfunctions, smoke or fire if they come into contact with electrical parts.
- Do not place objects around the indoor unit. Doing so may have an adverse influence on the performance, product quality, and life of the air conditioner.
- This appliance is not intended to be used by persons with reduced physical, sensory or mental capabilities, or with lack of operation knowledge, unless they have been given supervision or instruction concerning the appliance use by person responsible for their safety. Keep out of children's reach to ensure that they do not play with the appliance.
- For care and cleaning, call service personnel.

This is an appliance that is not accessible to the general public.

Installation site
- To install the air conditioner in the following types of environments, consult your dealer.
  - Places with an oily environment or where steam or soot occurs.
  - Salty environments such as coastal areas.
  - Places where sulphide gas occurs such as hot springs.
- Be sure to follow the instructions below.
  - The indoor unit is at least 1m away from any television or radio set (unit may cause interference with the picture or sound).
  - The drain from the outdoor unit must be discharged to a place of good drainage.

Consider nuisance to your neighbours from noises
- For installation, choose a place as described below.
  - A place solid enough to bear the weight of the unit and which does not amplify the operation noise or vibration.
  - A place from where the air discharged from the outdoor unit or the operation noise will not annoy your neighbours.

Electrical work
- For the power supply, be sure to use a separate power circuit dedicated to the air conditioner.

System relocation
- Relocating the air conditioner requires specialized knowledge and skills. Please consult your dealer if relocation is necessary for moving or remodelling.
Names of Parts

**Indoor Unit**

- **Front panel**
- **Air inlet**
- **Air outlet**
- **Model name**
- **INTELLIGENT EYE sensor**
  - Detects the movements of people and automatically switches between normal operation and energy saving operation.
- **Indoor temperature sensor**
  - Detects the air temperature around the unit.

**Flap (horizontal blade)**
- Receives signals from the remote controller.
- When the unit receives a signal, you will hear a beep sound.

**Louvres (vertical blades)**
- The louvres are inside of the air outlet.

**Display**

- **Signal receiver**
  - Receives signals from the remote controller.
  - When the unit receives a signal, you will hear a beep sound.
- **OPERATION lamp (green)**
- **TIMER lamp (orange)**
- **INTELLIGENT EYE lamp (green)**

**Indoor unit ON/OFF switch**
- Press this switch once to start operation.
- Press once again to stop it.
- For the operation mode setting, refer to the following table.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Temperature setting</th>
<th>Airflow rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>COOL</td>
<td>22°C</td>
<td>AUTO</td>
</tr>
</tbody>
</table>

- This switch can be used when the remote controller is missing.
Open the front panel

Outdoor Unit

• The appearance of the outdoor unit may differ between different models.
Names of Parts

Remote Controller

Signal transmitter
• To use the remote controller, aim the transmitter at the indoor unit. If there is anything blocking the signals between the unit and the remote controller, such as a curtain, the unit may not operate. • The maximum transmission distance is about 7m.

FAN setting button
• Selects the airflow rate setting. ►Page 13

POWERFUL button
• POWERFUL operation. ►Page 17

Display (LCD)
• Displays the current settings. (In this illustration, each section is shown with all its displays on for the purpose of explanation.)

TEMPERATURE adjustment button
• Changes the temperature setting. ►Page 12

ON/OFF button
• Press this button once to start operation. Press once again to stop it. ►Page 11

Front cover
• Open the front cover. ►Page 8

[ARC466A19]
Open the front cover

- **MODE selector button**
  - Selects the operation mode.
  - (DRY/COOL/FAN) [Page 11]

- **ECONO/QUIET button**

- **WEEKLY button**
  - WEEKLY TIMER operation. [Page 21]
Preparation Before Operation

To insert the batteries

1. Slide the front cover to take it off.
2. Insert 2 dry batteries AAA.LR03 (alkaline).
3. Replace the front cover.

To fix the remote controller holder to a wall

1. Choose a place from where the signals reach the unit.
2. Fix the holder to a wall, a pillar, or similar location with the screws supplied with the holder.
3. Place the remote controller in the remote controller holder.

Turn on the circuit breaker

• After the power is turned on, the flap of the indoor unit opens and closes once to set the reference position.

CAUTION

Incorrect handling of batteries can result in injury from battery leakage, rupturing or heating, or lead to equipment failure.

Please observe the following precautions and use safely.
• If the alkaline solution from the batteries should get in the eyes, do not rub the eyes. Instead, immediately flush the eyes with tap water and seek the attention of a medical professional.
• Keep batteries out of reach of children. In the event that batteries are swallowed, seek the immediate attention of a medical professional.
• Do not expose batteries to heat or fire. Do not disassemble or modify batteries. The insulation or gas release vent inside the battery may be damaged, resulting in battery leakage, rupturing, or heating.
• Do not damage or peel off labels on the batteries.

NOTE

Notes on batteries
• To avoid possible injury or damage from battery leakage or rupturing, remove the batteries when not using the product for long periods of time.
• The standard replacement time is 1 year. Both batteries should be replaced at the same time. Be sure to replace them with new size AAA.LR03 (alkaline) batteries.
• When battery power has run out, the LCD will begin blinking as an alert that the batteries need replacing. In some cases, when battery consumption is accelerated owing usage conditions, signal reception may decline before the LCD begins blinking.
• The batteries supplied with the remote controller are for initial operation. The batteries may run out in less than 1 year.

Note on remote controller
• Do not drop the remote controller. Do not get it wet.
To set the clock

1. Press \( \text{MON} \). “\( \text{MON} \)” is displayed on the LCD. “\( \text{MON} \)” and “\( \text{MON} \)” blink.

2. Press \( \text{Select} \) to set the current day of the week.

3. Press \( \text{MON} \). “\( \text{MON} \)” blinks.

4. Press \( \text{Select} \) to set the clock to the present time.
   - Holding down \( \text{Select} \) \( \text{Select} \) rapidly increases or decreases the displayed time.

5. Press \( \text{MON} \) . \( \text{MON} \) . “\( \text{MON} \)” blinks.
   - Point the remote controller at the indoor unit when pressing the buttons.

NOTE

Note on setting the clock
• If the indoor unit’s internal clock is not set to the correct time, the ON/OFF TIMER and WEEKLY TIMER will not operate punctually.
To start operation

1. Press \( \text{Mode} \) and select an operation mode.
   • Each pressing of the button changes the mode setting in sequence.

2. Press \( \text{ } \) .
   • " \text{ON} " is displayed on the LCD.
   • The OPERATION lamp lights green.

To stop operation

Press \( \text{ } \) again.
   • " \text{ON} " disappears from the LCD.
   • The OPERATION lamp goes off.

NOTE

Note on DRY operation
• Eliminates humidity while maintaining the indoor temperature as much as possible. It automatically controls temperature and airflow rate, so manual adjustment of these functions is unavailable.
Basic Operation

To change the temperature setting

Press Temp.

- Press ▲ to raise the temperature and press ▼ to lower the temperature.

<table>
<thead>
<tr>
<th>COOL operation</th>
<th>DRY or FAN operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>18-32°C</td>
<td>The temperature setting cannot be changed.</td>
</tr>
</tbody>
</table>

Tips for saving energy

Keeping the temperature setting at a moderate level helps save energy.
- Recommended temperature setting
  - For cooling: 26-28°C

Cover windows with a blind or a curtain.
- Blocking sunlight and air from outdoors increases the cooling effect.

Keep the air filters clean.
- Clogged air filters cause inefficient operation and waste energy. Clean them once in about every 2 weeks. ➤Page 30

If you are not going to use the air conditioner for a long period, for example in spring or autumn, turn off the circuit breaker.
- The air conditioner always consumes a small amount of electricity even while it is not operating.
Basic Operation

Adjusting the Airflow Rate

You can adjust the airflow rate to increase your comfort.

To adjust the airflow rate setting

Press \( \text{Fan} \).

- Each pressing of \( \text{Fan} \) changes the airflow rate setting in sequence.

\[ \text{AUTO} \rightarrow \text{Indoor unit quiet} \rightarrow \text{Airflow rate 1-5 (Low to High)} \]

- When the airflow is set to “\( \text{Fan} \)”, quiet operation starts and noise from the indoor unit will become quieter.
- In the quiet operation mode, the airflow rate is set to a weak level.
- In DRY operation, the airflow rate setting cannot be changed.

NOTE

Note on airflow rate setting

- At smaller airflow rates, the cooling effect is also smaller.
Adjusting the Airflow Direction

You can adjust the airflow direction to increase your comfort.

⚠️ CAUTION
- Always use a remote controller to adjust the angles of the flap and louvres.
  - If you attempt to move the flap and louvres forcibly by hand when they are swinging, the mechanism may be damaged.
  - Inside the air outlet, a fan is rotating at a high speed.

### To start auto swing

#### Up and down airflow direction

Press 🖸.

- * is displayed on the LCD.
- The flap (horizontal blade) will begin to swing.

#### Right and left airflow direction

Press 🖸.

- * is displayed on the LCD.
- The louvres (vertical blades) will begin to swing.

#### The 3-D airflow direction

Press 🖸 and 🖸.

- * and * are displayed on the LCD.
- The flap and louvres move in turn.
- To cancel 3-D airflow, press either 🖸 or 🖸 again. The flap or louvres will stop moving.

### To set the flap or louvres at the desired position

- This function is effective while the flap or louvres are in auto swing mode.

Press 🖸 and 🖸 when the flap or louvres reach the desired position.

- In the 3-D airflow, the flap and louvres move in turn.
- * or * disappears from the LCD.

**NOTE**

**Notes on airflow direction setting**

- The movable range of the flap varies according to the operation mode.
- The flap will stop at the upper position when the airflow rate is changed to low during the up and down swing setting.

**Note on 3-D airflow**

- Using 3-D airflow circulates cold air, which tends to collect at the bottom of the room, and hot air, which tends to collect near the ceiling, throughout the room, preventing areas of cold and hot developing.

![Movable range of the flap](image-url)
COMFORT AIRFLOW / INTELLIGENT EYE Operation

COMFORT AIRFLOW operation: The airflow direction is upward while in COOL and DRY operation. This function prevents cold air from blowing directly on the occupants in the room.

INTELLIGENT EYE operation: The INTELLIGENT EYE sensor detects human movement. If no one is in the room for more than 20 minutes, the operation automatically changes to energy saving operation.

⚠️ CAUTION
- Do not place large objects near the INTELLIGENT EYE sensor. Also keep heating units and humidifiers outside the sensor’s detection area. This sensor can detect undesirable objects.
- Do not hit or violently push the INTELLIGENT EYE sensor. This can lead to damage and malfunction.

To start operation

Press and select the desired mode.
- Each time is pressed, a different setting option is displayed on the LCD.
- When INTELLIGENT EYE is selected, the INTELLIGENT EYE lamp lights green.

Display
- By selecting “ ” from the following icons, the air conditioner will switch to COMFORT AIRFLOW operation combined with INTELLIGENT EYE operation.

COMFORT AIRFLOW → INTELLIGENT EYE → Combination → blank

- When the flap (horizontal blade) are swinging, selecting any of the modes above will cause the flap (horizontal blade) to stop.

To cancel operation

Press until no icon is displayed.
- If the INTELLIGENT EYE operation was being used, the INTELLIGENT EYE lamp goes off.
Useful Functions

INTELLIGENT EYE operation is useful for energy saving

- People are detected in the sensing area.
- No people are detected in the sensing area.

The air conditioner is in normal operation while the sensor is detecting human movement.

The air conditioner will switch to energy-saving mode after 20 minutes.

Energy saving operation

- If no presence detected in the room for 20 minutes, the energy saving operation will start, and the INTELLIGENT EYE lamp goes off. If human movement is detected again, the INTELLIGENT EYE lamp lights up and energy saving operation terminates.
- This operation changes the temperature by +2°C in COOL / +2°C in DRY operation from the set temperature. When the room temperature exceeds 30°C, the operation changes the temperature by +1°C in COOL / +1°C in DRY operation from the set temperature.
- This operation decreases the airflow rate slightly in FAN operation only.

NOTE

Note on COMFORT AIRFLOW operation

- The airflow rate will be set to AUTO. If the up and down airflow direction is selected, COMFORT AIRFLOW operation will be cancelled.

Notes on INTELLIGENT EYE operation

- Application range is as follows.

<table>
<thead>
<tr>
<th>5°</th>
<th>90°</th>
</tr>
</thead>
<tbody>
<tr>
<td>5°</td>
<td>90°</td>
</tr>
</tbody>
</table>

- The sensor may not detect moving objects further than 7m away. (Please see the application range)
- Sensor detection sensitivity changes according to the indoor unit location, the speed of passers-by, temperature range, etc.
- The sensor could also mistakenly detect pets, sunlight, fluttering curtains and light reflected off of mirrors as passers-by.
- NIGHT SET mode [Page 20] will not switch on during use of INTELLIGENT EYE operation.

Note on combination of COMFORT AIRFLOW operation and INTELLIGENT EYE operation

- The airflow rate will be set to AUTO. If the up and down airflow direction is selected, COMFORT AIRFLOW operation will be cancelled.
- Priority is given to the function of whichever button is pressed last.
Useful Functions

POWERFUL Operation

POWERFUL operation quickly maximises the cooling effect in any operation mode. In this mode, the air conditioner operates at maximum capacity.

To start POWERFUL operation

Press \( \text{Power} \) during operation.

- "\( \text{Power} \)" is displayed on the LCD.
- POWERFUL operation ends in 20 minutes. Then the system automatically operates again with the previous settings which were used before POWERFUL operation.

To cancel POWERFUL operation

Press \( \text{Power} \) again.

- "\( \text{Power} \)" disappears from the LCD.

NOTE

Notes on POWERFUL operation

- Pressing \( \text{Power} \) causes the settings to be cancelled, and "\( \text{Power} \)" disappears from the LCD.
- POWERFUL operation will not increase the capacity of the air conditioner if the air conditioner is already in operation with its maximum capacity demonstrated.
  - In COOL operation
    To maximise the cooling effect, the capacity of outdoor unit increases and the airflow rate becomes fixed at the maximum setting. The temperature and airflow settings cannot be changed.
  - In DRY operation
    The temperature setting is lowered by 2.5°C and the airflow rate is slightly increased.
  - In FAN operation
    The airflow rate is fixed at the maximum setting.
  - When using priority room setting
    Refer to “Note for Multi System” Page 27

Regarding the combination of POWERFUL and other operations

<table>
<thead>
<tr>
<th>Combination</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWERFUL + COMFORT AIRFLOW</td>
<td>Not available*</td>
</tr>
<tr>
<td>POWERFUL + ECONO</td>
<td></td>
</tr>
<tr>
<td>POWERFUL + OUTDOOR UNIT QUIET</td>
<td></td>
</tr>
</tbody>
</table>

*Priority is given to the function of whichever button is pressed last.
ECONO / OUTDOOR UNIT QUIET Operation

ECONO operation enables efficient operation by limiting the maximum power consumption. This function is useful to prevent the circuit breaker from tripping when the unit operates alongside other appliances on the same circuit.

OUTDOOR UNIT QUIET operation lowers the noise level of the outdoor unit by changing the frequency and fan speed of the outdoor unit. This function is convenient during the night-time operation.

To start operation

Press and select the desired mode.

• Each time is pressed, a different setting option is displayed on the LCD.

To cancel operation

Press until no icon is displayed.

NOTE

Notes on ECONO operation

• Pressing causes the settings to be cancelled, and " " disappears from the LCD.

• If the power consumption level is already low, switching to ECONO operation will not reduce the power consumption.

Notes on OUTDOOR UNIT QUIET operation

• If using a multi system, the OUTDOOR UNIT QUIET operation will work only when this function is set on all operated indoor units. However, if using priority room setting, refer to "Note for Multi System" Page 27.

• Even if the operation is stopped by using the remote controller or the indoor unit ON/OFF switch when using OUTDOOR UNIT QUIET operation, " " will remain displayed on the remote controller.

• OUTDOOR UNIT QUIET operation will not reduce the frequency nor fan speed if they already are operating at reduced levels.

• This operation is performed with lower power and therefore may not provide a sufficient cooling effect.

Possible combinations of ECONO / OUTDOOR UNIT QUIET operation and basic operations

<table>
<thead>
<tr>
<th>Operation mode</th>
<th>DRY</th>
<th>COOL</th>
<th>FAN</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>
ON/OFF TIMER Operation

Timer functions are useful for automatically switching the air conditioner on or off at night or in the morning. You can also use the ON TIMER and OFF TIMER together.

To use ON TIMER operation

• Check that the clock is correct. If not, set the clock to the present time. [Page 10]

1. Press  on.

“5:00” is displayed on the LCD.
“ON” blinks.

• “Θ” and day of the week disappear from the LCD.

2. Press  until the time setting reaches the point you like.

• Each pressing of either button increases or decreases the time setting by 10 minutes.

Holding down either button changes the setting rapidly.

3. Press  On again.

• “ON” and setting time are displayed on the LCD.

• The TIMER lamp lights orange.

To cancel ON TIMER operation

Press  cancel.

• “ON” and setting time disappear from the LCD.

• “Θ” and day of the week are displayed on the LCD.

• The TIMER lamp goes off.

NOTE

Notes on TIMER operation

• When TIMER is set, the present time is not displayed.

• When using the ON/OFF TIMER to start/stop operation, the actual operation start/stop time may differ from the time set. (Maximum of about 10 minutes)

In the following cases, set the timer again.

• After the circuit breaker has turned off.

• After a power failure.

• After replacing the batteries in the remote controller.
## TIMER Operation

### To use OFF TIMER operation

- Check that the clock is correct. If not, set the clock to the present time. \(\text{Page 10}\)

1. **Press** \(\text{Off}\).
   - “000” is displayed on the LCD.
   - “Off” blinks.
   - “Roger” and day of the week disappear from the LCD.

2. **Press** until the time setting reaches the point you like.
   - Each pressing of either button increases or decreases the time setting by 10 minutes.
   - Holding down either button changes the time setting rapidly.

3. **Press** \(\text{Off}\) again.
   - “Off” and setting time are displayed on the LCD.
   - The TIMER lamp lights orange.

### To cancel OFF TIMER operation

**Press** \(\text{Cancel}\).
- “Off” and setting time disappear from the LCD.
- “Roger” and day of the week are displayed on the LCD.
- The TIMER lamp goes off.

### To combine ON TIMER and OFF TIMER operation

- A sample setting for combining the 2 timers is shown below.

```
(Example)
Present time: 23:00 (The unit is operating)
OFF TIMER at 0:00
ON TIMER at 14:00
```

### NOTE

**NIGHT SET mode**
- When the OFF TIMER is set, the air conditioner automatically adjusts the temperature setting (0.5°C up in COOL) to prevent excessive cooling during sleeping hours.
**WEEKLY TIMER Operation**

Up to 4 timer settings can be saved for each day of the week. This is convenient to adapt the WEEKLY TIMER to your family’s life style.

### Setting example of the WEEKLY TIMER

The same timer settings are used from Monday through Friday, while different timer settings are used for the weekend.

<table>
<thead>
<tr>
<th>Day</th>
<th>Programme 1</th>
<th>Programme 2</th>
<th>Programme 3</th>
<th>Programme 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Monday]</td>
<td>ON 25°C</td>
<td>OFF</td>
<td>ON 27°C</td>
<td>OFF</td>
</tr>
<tr>
<td></td>
<td>6:00</td>
<td>8:30</td>
<td>17:30</td>
<td>22:00</td>
</tr>
<tr>
<td>[Tuesday] to [Friday]</td>
<td>ON 25°C</td>
<td>OFF</td>
<td>ON 27°C</td>
<td>OFF</td>
</tr>
<tr>
<td></td>
<td>6:00</td>
<td>8:30</td>
<td>17:30</td>
<td>22:00</td>
</tr>
<tr>
<td>[Saturday]</td>
<td>No timer settings</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>[Sunday]</td>
<td>Make timer settings for programmes 1-4</td>
<td>Page 22</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Programme 1</td>
<td>Programme 2</td>
<td>Programme 3</td>
<td>Programme 4</td>
</tr>
<tr>
<td></td>
<td>ON 25°C</td>
<td>OFF</td>
<td>27°C</td>
<td>ON</td>
</tr>
<tr>
<td></td>
<td>8:00</td>
<td>10:00</td>
<td>19:00</td>
<td>21:00</td>
</tr>
</tbody>
</table>

- Up to 4 reservations per day and 28 reservations per week can be set using the WEEKLY TIMER. The effective use of the copy mode simplifies timer programming.
- The use of ON-ON-ON-ON settings, for example, makes it possible to schedule operating mode and set temperature changes. Furthermore, by using OFF-OFF-OFF-OFF settings, only the turn off time of each day can be set. This will turn off the air conditioner automatically if you forget to turn it off.
To use WEEKLY TIMER operation

**Setting mode**

- Make sure the day of the week and time are set. If not, set the day of the week and time. [Page 10]

### Programme 1 Programme 2 Programme 3 Programme 4

- **6:00 8:30 17:30 22:00**
- **25°C 27°C**

**Programme 1**

**Programme 4**

- **ON**
- **OFF**

**Setting Displays**

- Day and number
- ON/OFF
- Time
- Temperature

1. **Press** .
   - The day of the week and the reservation number of the current day will be displayed.
   - 1 to 4 settings can be made per day.

2. **Press** to select the desired day of the week and reservation number.
   - Pressing changes the reservation number and the day of the week.

3. **Press** .
   - The day of the week and reservation number will be set.
   - “ON WEEKLY” and “ON” blink.

4. **Press** to select the desired mode.
   - Pressing changes the “ON” or “OFF” setting in sequence.

   - In case the reservation has already been set, selecting “blank” deletes the reservation.
   - Proceed to **STEP 9** if “blank” is selected.
   - To return to the day of the week and reservation number setting, press .

5. **Press** .
   - The ON/OFF TIMER mode will be set.
   - “ON WEEKLY” and the time blink.
WEEKLY TIMER Operation

6. Press \(\square\) to select the desired time.
   • The time can be set between 0:00 and 23:50 in 10-minute intervals.
   • To return to the ON/OFF TIMER mode setting, press \(\square\).
   • Proceed to STEP 9 when setting the OFF TIMER.

7. Press \(\square\).
   • The time will be set.
   • "WEEKLY" and the temperature blink.

8. Press \(\square\) to select the desired temperature.
   • The temperature can be set between 10°C and 32°C.
   • COOL: The unit operates at 18°C even if it is set to 10 to 17°C.
   • To return to the time setting, press \(\square\).
   • The set temperature is only displayed when the mode setting is on.

9. Press \(\square\).
   • Be sure to direct the remote controller toward the indoor unit and check for a receiving tone and blinking of the OPERATION lamp.
   • The temperature will be set and go to the next reservation setting.
   • The temperature is set while in ON TIMER operation, and the time is set while in OFF TIMER operation.
   • The next reservation screen will appear.
   • To continue further settings, repeat the procedure from STEP 4.
   • The TIMER lamp lights orange.

10. Press \(\square\) to complete the setting.
    • "WEEKLY" is displayed on the LCD and WEEKLY TIMER operation is activated.
    • A reservation made once can be easily copied and the same settings used for another day of the week. Refer to Copy mode.

NOTE

Notes on WEEKLY TIMER operation
• Do not forget to set the clock on the remote controller first.
• The day of the week, ON/OFF TIMER mode, time and set temperature (only for ON TIMER mode) can be set with the WEEKLY TIMER.
• Other settings for the ON TIMER are based on the settings just before the operation.
• WEEKLY TIMER and ON/OFF TIMER operation cannot be used at the same time. The ON/OFF TIMER operation has priority if it is set while WEEKLY TIMER is still active. The WEEKLY TIMER will enter the standby state, and "WEEKLY" will disappear from the LCD. When the ON/OFF TIMER is up, the WEEKLY TIMER will automatically become active.
• Only the time and set temperature with the WEEKLY TIMER are sent with the \(\square\). Set the WEEKLY TIMER only after setting the operation mode, the airflow rate and the airflow direction ahead of time.
• Turning off the circuit breaker, power failure, and other similar events will render operation of the indoor unit’s internal clock inaccurate. Reset the clock.
• \(\square\) can be used only for the time and temperature settings. It cannot be used to go back to the reservation number.
Copy mode

- A reservation made once can be copied to another day of the week. The whole reservation of the selected day of the week will be copied.

Setting Displays

1. Press .
2. Press to confirm the day of the week to be copied.
3. Press .
   - The whole reservation of the selected day of the week will be copied.
4. Press to select the destination day of the week.
5. Press .
   - The reservation will be copied to the selected day of the week. The whole reservation of the selected day of the week will be copied.
   - To continue copying the settings to other days of the week, repeat STEP 4 and STEP 5.
6. Press to complete the setting.
   - "O WEEKLY" is displayed on the LCD and WEEKLY TIMER operation is activated.

Note on COPY MODE

- The entire reservation of the source day of the week is copied in the copy mode.

In the case of making a reservation change for any day of the week individually after copying the content of weekly reservations, press and change the settings in the steps of Setting mode. 

NOTE
WEEKLY TIMER Operation

Confirming a reservation

- The reservation can be confirmed.

Setting Displays

1. Press .
   - The day of the week and the reservation number of the current day will be displayed.

2. Press to select the day of the week and the reservation number to be confirmed.
   - Pressing displays the reservation details.
   - To change the confirmed reserved settings, select the reservation number and press . The mode is switched to setting mode. Proceed to Setting mode STEP 4. Page 22

3. Press to exit the confirmation mode.
   - " Weekly" is displayed on the LCD and WEEKLY TIMER operation is activated.
   - The TIMER lamp lights orange.

To deactivate WEEKLY TIMER operation

- Press while " Weekly" is displayed on the LCD.
  - " Weekly" disappears from the LCD.
  - The TIMER lamp goes off.
  - To reactivate the WEEKLY TIMER operation, press Weekly again.
  - If a reservation deactivated with Weekly is activated once again, the last reservation mode will be used.

NOTE

- If not all the reservation settings are reflected, deactivate the WEEKLY TIMER operation once. Then press Weekly again to reactivate the WEEKLY TIMER operation.
To delete reservations

**An individual reservation**

1. Press \[\text{Next}\] .
   - The day of the week and the reservation number will be displayed.

2. Press \[\text{Select}\] to select the day of the week and the reservation number to be deleted.

3. Press \[\text{Next}\] .
   - "ON WEEKLY" and "ON" or "OFF" blink.

4. Press \[\text{Select}\] until no icon is displayed.
   - Pressing \[\text{Select}\] changes the ON/OFF TIMER mode in sequence.
   - Selecting "blank" will cancel any reservation you may have.

   - Pressing \[\text{Next}\] puts the sequence in reverse.

5. Press \[\text{Next}\] .
   - The selected reservation will be deleted.

6. Press \[\text{Next}\] .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

**Reservations for each day of the week**

- This function can be used for deleting reservations for each day of the week.
- It can be used while confirming or setting reservations.

1. Press \[\text{Next}\] .
   - The day of the week and the reservation number will be displayed.

2. Press \[\text{Select}\] to select the day of the week to be deleted.

3. Hold \[\text{Weekly}\] for about 5 seconds.
   - The reservation of the selected day of the week will be deleted.

4. Press \[\text{Next}\] .
   - If there are still other reservations, WEEKLY TIMER operation will be activated.

**All reservations**

- Hold \[\text{Weekly}\] for about 5 seconds with the normal display.
  - Be sure to direct the remote controller toward the indoor unit and check for a receiving tone.
  - This operation cannot be used for the WEEKLY TIMER setting display.
  - All reservations will be deleted.
Note for Multi System

A multi system has one outdoor unit connected to multiple indoor units.

Selecting the operation mode

**When the priority room setting is active but the set unit is not operating or when the priority room setting is inactive**

When more than one indoor unit is operating, priority is given to the first unit that was turned on.
In this case, set the units that are turned on later to the same operation mode as the first unit.
Otherwise, they will enter the standby state, and the OPERATION lamp will blink; this does not indicate malfunction.

NOTE

Notes on operation mode for a multi system

• COOL, DRY and FAN operation may be used at the same time.

**With the priority room setting active**

Refer to “Priority room setting” on the next page.

NIGHT QUIET mode (Available only for COOL operation)

NIGHT QUIET mode requires initial programming during installation. Please consult your retailer or dealer for assistance.
NIGHT QUIET mode reduces the operation noise of the outdoor unit during the night-time hours to prevent annoyance to neighbours.
- NIGHT QUIET mode is activated when the temperature drops 6°C or more below the highest temperature recorded that day.
  When the temperature difference between the current outdoor temperature and the maximum outdoor temperature becomes less than 4°C, this function will be cancelled.
- NIGHT QUIET mode slightly reduces the cooling efficiency of the unit.

OUTDOOR UNIT QUIET operation

Refer to “OUTDOOR UNIT QUIET operation”. ▶Page 18

**When the priority room setting is active but the set unit is not operating or when the priority room setting is inactive**

When using the OUTDOOR UNIT QUIET operation feature with a multi system, set all indoor units to OUTDOOR UNIT QUIET operation using their remote controllers.
When cancelling OUTDOOR UNIT QUIET operation, simply cancel the mode on one of the operating indoor units using their remote controller.
However OUTDOOR UNIT QUIET operation will remain displayed on the remote controllers for the other rooms.
We recommend you cancel operation in all rooms using their remote controllers.

**With the priority room setting active**

Refer to “Priority room setting” on the next page.
Priority room setting

The priority room setting requires initial programming during installation. Please consult your authorized dealer for assistance. The room designated as the priority room takes priority in the following situations.

Operation mode priority

- As the operation mode of the priority room takes precedence, you can select a different operation mode from other rooms.

[Example]
- Room A is the priority room in this example.
  When COOL operation is selected in room A while operating the following modes in room B, C and D:

<table>
<thead>
<tr>
<th>Operation mode in room B, C and D</th>
<th>Status of room B, C and D when the unit in room A is in COOL operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>COOL or DRY or FAN</td>
<td>The current operation mode is maintained.</td>
</tr>
</tbody>
</table>

Priority when POWERFUL operation is used

[Example]
- Room A is the priority room in this example.
  The indoor units in rooms A, B, C and D are all operating. If the unit in room A enters POWERFUL operation, operation capacity will be concentrated in room A. In such a case, the cooling efficiency of the units in room B, C and D may be slightly reduced.

Priority when OUTDOOR UNIT QUIET operation is used

[Example]
- Room A is the priority room in this example.
  Just by setting the unit in room A to QUIET operation, the air conditioner starts OUTDOOR UNIT QUIET operation. You do not have to set all the indoor units in operation to OUTDOOR UNIT QUIET operation.
Care and Cleaning

⚠️ CAUTION
- Before cleaning, be sure to stop the operation and turn off the circuit breaker.
- Do not touch the aluminum fins of the indoor unit. If you touch those parts, this may cause an injury.

Quick reference

Cleaning parts

- **Front panel**
  - Wipe it with a soft damp cloth.
  - Only neutral detergent may be used.
  - If dirty

- **Air filter**
  - Vacuum dust or wash the filter.
  - Once every 2 weeks

- **Indoor unit, outdoor unit and remote controller**
  - Wipe them with a soft cloth.
  - If dirty

- **Titanium apatite photocatalytic air-purifying filter**
  - Vacuum dust or replace the filter.
  - [Cleaning] Once every 6 months
  - [Replacement] Once every 3 years

Notes on cleaning

For cleaning, do not use any of the following:
- Water hotter than 40°C
- Volatile liquid such as benzene, petrol and thinner
- Polishing compounds
- Rough materials such as a scrubbing brush
1. Open the front panel.
   - Hold the front panel by the sides and open it.

2. Pull out the air filters.
   - Push the filter tab at the centre of each air filter a little upwards, then pull it down.

3. Wash the air filters with water or clean them with vacuum cleaner.
   - It is recommended to clean the air filters every 2 weeks.

4. Reattach the filters.

5. Close the front panel slowly.
   - Press the panel at both sides and the centre.
   - Make sure that the front panel is securely fixed.
Care and Cleaning

Titanium apatite photocatalytic air-purifying filter

1. Open the front panel and pull out the air filters. [Page 30]

2. Take off the titanium apatite photocatalytic air-purifying filters.
   • Remove the filters from the tabs.

3. Clean or replace the titanium apatite photocatalytic air-purifying filters.

   [Cleaning]
   3-1 Vacuum dust, and soak in lukewarm water or water for about 10 to 15 minutes if very dirty.

   3-2 After washing, shake off remaining water and let them dry in the shade.
   • Do not wring out the filter to remove water from it.

   [Replacement]
   Remove the filter from the tabs and prepare a new one.
   • Dispose of the old filter as non-flammable waste.

4. Insert the titanium apatite photocatalytic air-purifying filters as they were.
   • When attaching the filter, check that the filter is properly set in the tabs.

5. Reattach the filters. [Page 30]

6. Close the front panel slowly. [Page 30]

NOTE
• Operation with dirty filters:
  – cannot deodorise the air,
  – cannot clean the air,
  – results in poor cooling,
  – may cause odour.
• Dispose of old filters as non-flammable waste.
• To order a titanium apatite photocatalytic air-purifying filter, contact the dealer where you bought the air conditioner.

<table>
<thead>
<tr>
<th>Item</th>
<th>Titanium apatite photocatalytic air-purifying filter (set of 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Part No.</td>
<td>KAF970A46 (without frame)</td>
</tr>
</tbody>
</table>
Prior to a long period of non-use

1. Operate the FAN mode for several hours on a fine day to dry out the inside.
   1) Press \textbf{Mode} and select “\textbullet{\textbullet}”.
   2) Press \textbf{ } and start the operation.

2. After operation stops, turn off the circuit breaker for the room air conditioner.

3. Clean the air filters and reattach them.

4. To prevent battery leakage, take out the batteries from the remote controller.

We recommend periodical maintenance

• In certain operating conditions, the inside of the air conditioner may get foul after several seasons of use, resulting in poor performance. It is recommended to have periodical maintenance by a specialist in addition to regular cleaning by the user.
• For specialist maintenance, please contact the dealer where you bought the air conditioner.
• The maintenance cost must be borne by the user.
FAQ

Indoor unit

The flap does not start swinging immediately.
- The air conditioner is adjusting the position of the flap. The flap will start moving soon.

Operation does not start soon.
- When the unit is turned on again soon after being turned off.
- When the mode was reselected.
  - This is to protect the air conditioner. You should wait for about 3 minutes.

Different sounds are heard.
- A sound like flowing water
  - This sound is generated because the refrigerant in the air conditioner is flowing.
  - This is a pumping sound of the water in the air conditioner and can be heard when the water is pumped out from the air conditioner during COOL or DRY operation.
  - The refrigerant flows in the air conditioner even if the air conditioner is not working when the indoor units in other rooms are in operation.

- Ticking sound
  - This sound is generated when the cabinet and frame of the air conditioner slightly expand or shrink as a result of temperature changes.

- Clicking sound during operation or idle time
  - This sound is generated when the refrigerant control valves or the electrical parts operate.

- Clopping sound
  - This sound is heard from the inside of the air conditioner when the exhaust fan is activated while the room doors are closed. Open the window or turn off the exhaust fan.

Outdoor unit

The outdoor unit emits water.
- In COOL or DRY operation
  - Moisture in the air condenses into water on the cool surface of the outdoor unit piping and drips.
When the Need Arises

Troubleshooting

Before making an inquiry or a request for repair, please check the following. If the problem persists, consult your dealer.

**Not a problem**
This case is not a problem.

**Check**
Please check again before requesting repairs.

### The air conditioner does not operate

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>OPERATION lamp is off.</td>
<td>• Has the circuit breaker been tripped or the fuse blown?</td>
</tr>
<tr>
<td></td>
<td>• Is there a power failure?</td>
</tr>
<tr>
<td></td>
<td>• Are batteries set in the remote controller?</td>
</tr>
<tr>
<td>OPERATION lamp is blinking.</td>
<td>• Turn off the power with the circuit breaker and restart operation with the remote controller.</td>
</tr>
<tr>
<td></td>
<td>If the OPERATION lamp is still blinking, check the error code and consult your dealer.</td>
</tr>
</tbody>
</table>

### The air conditioner suddenly stops operating

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>OPERATION lamp is on.</td>
<td>• To protect the system, the air conditioner may stop operating after sudden large voltage fluctuations. It automatically resumes operation in about 3 minutes.</td>
</tr>
<tr>
<td></td>
<td>• Is there anything blocking the air inlet or air outlet of the indoor unit or outdoor unit? Stop operation and after turning off the circuit breaker, remove the obstruction. Then restart operation with the remote controller. If the OPERATION lamp is still blinking, check the error code and consult your dealer. Page 37</td>
</tr>
<tr>
<td>OPERATION lamp is blinking.</td>
<td>• Are operation modes all the same for indoor units connected to the outdoor unit in the multi system? If not, set all indoor units to the same operation mode and confirm that the lamps blink. If the lamps stop blinking after the above steps, there is no malfunction.</td>
</tr>
</tbody>
</table>

### The air conditioner does not stop operating

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>

<tr>
<td></td>
<td>• Is an exhaust fan turning?</td>
</tr>
</tbody>
</table>
### Troubleshooting

#### When the Need Arises

#### Mist comes out

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mist comes out of the indoor unit.</td>
<td>• This happens when the air in the room is cooled into mist by the cold airflow during COOL or other operation.</td>
</tr>
</tbody>
</table>

#### Remote controller

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit does not receive signals from the remote controller or has a limited operating range.</td>
<td>• The batteries may be exhausted. Replace both batteries with new dry batteries AAA LR03 (alkaline). For details, refer to “Preparation Before Operation”. Page 9 • Signal communication may be disabled if an electronic-starter-type fluorescent lamp (such as inverter-type lamps) is in the room. Consult your dealer if that is the case. • The remote controller may not function correctly if the transmitter is exposed to direct sunlight.</td>
</tr>
<tr>
<td>LCD is faint, is not working, or the display is erratic.</td>
<td>• The batteries may be exhausted. Replace both batteries with new dry batteries AAA LR03 (alkaline). For details, refer to “Preparation Before Operation”. Page 9</td>
</tr>
<tr>
<td>The LCD is blinking and the remote controller cannot be operated.</td>
<td>• Battery power has run out. Replace both batteries at the same time with new size AAA LR03 (alkaline) batteries. Leaving exhausted batteries in the remote controller can result in injury due to battery leakage, rupturing or heating, or lead to equipment failure. (Even when the LCD is blinking, the OFF button remains functional.)</td>
</tr>
<tr>
<td>Other electric devices start operating.</td>
<td>• If the remote controller activates other electric devices, move them away or consult your dealer.</td>
</tr>
</tbody>
</table>

#### Air has an odour

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The air conditioner gives off an odour.</td>
<td>• The room odour absorbed in the unit is discharged with the airflow. We recommend you to have the indoor unit cleaned. Please consult your dealer.</td>
</tr>
</tbody>
</table>

#### Others

<table>
<thead>
<tr>
<th>Case</th>
<th>Description / what to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The air conditioner suddenly starts behaving strangely during operation.</td>
<td>• The air conditioner may malfunction due to lightning or radio. If the air conditioner malfunctions, turn off the power with the circuit breaker and restart the operation with the remote controller.</td>
</tr>
<tr>
<td>The ON/OFF TIMER does not operate according to the settings.</td>
<td>• Check if the ON/OFF TIMER and the WEEKLY TIMER are set to the same time. Change or deactivate the settings in the WEEKLY TIMER. Page 21</td>
</tr>
</tbody>
</table>

#### Notes on the operating conditions

- If operation continues under any conditions other than those listed in the table, – A safety device may activate to stop the operation.  
  (With a multi connection in COOL operation, the safety device may work to stop the operation of the outdoor unit only.) – Dew may form on the indoor unit and drip from it when COOL or DRY operation is selected.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Operating conditions</th>
</tr>
</thead>
</table>
| COOL / DRY | Outdoor temperature: 10-46°C  
Indoor temperature: 18-32°C  
Indoor humidity: 80% max. |
■ Call your dealer immediately

⚠️ WARNING

When an abnormality (such as a burning smell) occurs, stop operation and turn off the circuit breaker.

- Continued operation in an abnormal condition may result in problems, electric shock or fire.
- Consult the dealer where you bought the air conditioner.

Do not attempt to repair or modify the air conditioner by yourself.

- Incorrect work may result in electric shock or fire.
- Consult the dealer where you bought the air conditioner.

If one of the following symptoms takes place, call your dealer immediately.

- The power cord is abnormally hot or damaged.
- An abnormal sound is heard during operation.
- The circuit breaker, a fuse, or the earth leakage circuit breaker cuts off the operation frequently.
- A switch or a button often fails to work properly.
- There is a burning smell.
- Water leaks from the indoor unit.

Turn off the circuit breaker and call your dealer.

■ After a power failure

- The air conditioner automatically resumes operation in about 3 minutes. Please wait for a while.

■ Lightning

- If there is a risk lightning could strike in the neighbourhood, stop operation and turn off the circuit breaker to protect the system.

■ Disposal requirements

- Dismantling of the unit, handling of the refrigerant, oil and other parts, should be done in accordance with the relevant local and national regulations.
Troubleshooting

■ Fault diagnosis by remote controller
- The remote controller can receive relevant error codes from the indoor unit.

1. When is held down for about 5 seconds, “00” blinks in the temperature display section.

2. Press repeatedly until a continuous beep is produced.
- The code indication changes as shown below, and notifies you with a long beep.
